

Pedagogical Course

Higher Education Didactics for Sustainability (HEDS)

What?

This course provides participants with the forum to transform their pedagogical approaches in relation to the framework *Education for Sustainability (EfS)*, leveraging a problem-based learning approach. This peer-led & participatory approach engages learners on the topics of connection, competencies, teaching methods, and responsibilities in higher education. The course embodies the values of presence, care, honesty, respect, and engagement.

The course is equivalent to 80 hours full-time work, approx. 6 hours / week.

When?

The course runs 29 January – 26 April 2024.

Who?

We invite any educators or pedagogical developers in higher education with the desire to discuss and develop didactical approaches, which promotes the knowledge, skills, and values required to foster a more sustainable world. Participants from partner universities, as well as the larger global community, are invited to register.

How?

Register for the course no later than **8 December**.
Accepted participants will be notified by **22 December**.
